Let's Explore!

Sally contemplates **the road ahead***!

* "The road ahead" is an idiom we use to mean the future.

Instructions: Read the text aloud.

The future is not ahead of us. It is now. All of you have a vast array of concerns, questions and fears about the road ahead. I, too, have questions.

What will my own small world be like? Am I going to get married? Am I going to be a mother? Will I be a single parent? Will I have made any of these big decisions over the next five years? Will my career be transforming into something else? Will I have saved a large enough nest egg for my retirement? Will I be controlling my own future?

What will happen in our society during our lifetime? Will we have achieved world peace, or will we have begun another world war? Will most of us be living to a hundred because of advancements in medicine, nutrition and mental health? How cramped will our cities be? Will human life morph into something unrecognizable to us? Will this fragile and irreplaceable Earth survive?

I expect a few things in the future: in the next few months or more, I will be here in Cambridge. Tomorrow my gym opens at 6 a.m., and I am working out as I usually do. I will be eating dinner at 7 tonight at my friend's house. I am working every day next week and I am seeing a movie tomorrow. This is the future I know. Everything else is less certain, so I will live my life for the moment but keep in mind that anything is possible. I hope for the best but prepare for the worst.

The Future Continuous and Future Perfect Tenses

You use the Future Continuous tense to talk about something happening at a particular time in the future.

You use the **Future Perfect** tense to talk about an action that will be finished at some point in the future. It may be at a specific time.

When you use the **Future Continuous** tense, the action will have started before that moment but it will not have finished at that moment.

For example:

I will be studying at the library at 4 p.m. tomorrow.

The person will start studying at some point in the future and be studying at 4 p.m. It is not clear when the person will stop studying.

When you use the **Future Perfect** tense you are looking forward to a point in time. At that time in the future, you expect something to be completed.

For example:

*You can call me at work at 8 a.m. I **will have arrived** at the office by 8.*

*The train will leave the station at 9 a.m. You will arrive at the station at 9:15 a.m. When you arrive, the train **will have left**.*

Look at the chart for the structure of the Future Continuous and Future Perfect tenses:

Name	Structure	Example
Future Continuous	<i>will (not) + be + verb -ing</i>	<i>I will be eating dinner at 7 tonight at my friend's house.</i>
Future Perfect	<i>will + have + past participle</i>	<i>Will I have saved a large enough nest egg for my retirement?</i>

Examples:

- I will be eating dinner at 7 tonight at my friend's house.*
- Will I have made any of these big decisions over the next five years?*
- Will my career be transforming into something else?*
- Will I have saved a large enough nest egg for my retirement?*
- Will I be controlling my own future?*
